

Job Summary: Senior Coating Inspector

Role Overview

The Senior Coating Inspector is responsible for **monitoring, supervising, and ensuring quality compliance** of all coating and insulation activities during construction and pre-commissioning phases of a large LNG project. This includes overseeing contractors and subcontractors at site and vendor locations.

Key Responsibilities

- Ensure all coating and insulation work complies with **project specifications, standards, and contractual requirements**.
 - Monitor **quality control activities** such as material testing, inspections, and application processes.
 - Conduct **routine inspections, audits, and site visits** (QC & HSE).
 - Identify, report, and track **non-conformities and corrective actions**.
 - Verify:
 - Material quality, traceability, and certification
 - Equipment calibration
 - Coating application and testing procedures
 - Review inspection reports and provide **weekly QA/QC updates**.
 - Support construction teams and participate in **technical meetings and audits**.
 - Ensure strict adherence to **HSSE (Health, Safety, Security, Environment) standards**.
 - Report directly to the **Site Quality Lead**.
-

Core Activities

- Supervise contractor performance and ensure proper implementation of coating procedures

- Witness testing (raw materials, production, final inspection)
 - Monitor progress, backlog, and productivity
 - Provide early warning on quality risks
 - Ensure proper documentation and reporting
 - Enforce project quality systems and company policies
-

Required Qualifications & Experience

- Certification: **ACQPA / FROSIO / NACE Level 3**
 - Experience: **Minimum 15 years** in line pipe coating
 - Knowledge of **international insulation standards (ASTM, ISO)**
 - Strong skills in **inspection data analysis and reporting**
-

Key Competencies

- Strong expertise in:
 - Coating and construction techniques
 - Quality management systems
 - Good knowledge of:
 - Documentation control
 - Project coordination and risk assessment
 - Soft skills:
 - Communication and teamwork
 - Cross-cultural collaboration
 - Self-motivation and flexibility
-

Project Context

- Large-scale LNG bunkering development in Oman

- Includes LNG processing facilities, storage, marine jetty, and utilities
 - Designed for mid-scale production capacity with future expansion
-

Other Details

- Location: **Sohar, Oman**
- May involve **international travel**
