

JOB DESCRIPTION

Website Developer

Role Summary

Technical owner of the organisation's web properties. The Website Developer is responsible for the build, performance, security and ongoing maintenance of all websites, working closely with the design and brand teams.

REPORTS TO Head of Promotional Brand

DIRECT REPORTS None

EXPERIENCE REQUIRED 2 years

LOCATION On-site

TYPE Full-time, permanent

Qualifications

Bachelor's degree in Computer Science, Software Engineering, Web Development or related field. Demonstrated portfolio of production websites required.

Key Responsibilities

- Build and maintain the organisation's web properties end-to-end.
- Implement designs in modern front-end frameworks and integrate them with the chosen content management system.
- Ensure site performance, security, accessibility (WCAG) and bilingual (EN/AR, RTL) functionality.
- Manage hosting, deployments, version control, analytics implementation and third-party integrations.
- Maintain technical documentation and uptime/incident response procedures.
- Coordinate with external development or hosting partners where required.

Skills & Experience

- Strong proficiency in HTML, CSS, JavaScript and at least one modern framework (React, Vue, or similar).
- Hands-on experience with WordPress, Webflow, or comparable CMS platforms.
- Solid understanding of SEO fundamentals, web performance optimisation and analytics tagging.
- Experience building bilingual websites with right-to-left language support.
- Familiarity with hosting providers, deployment workflows and version control (Git).

- Strong English required; Arabic an advantage.
